

## JSCS40 Salt System Circuit Breaker Troubleshooting Guide

Situation	Cause	Corrective Action
The system will not turn on.	Circuit breaker may be tripped.	A 6 Amp resettable circuit breaker is located on the bottom right of the control panel. In the event that the circuit breaker trips, push on the rubber cover and you will feel it click as it resets.
System does not have green power light on.	Problem with power to Control Center.	<ul style="list-style-type: none"> <li>•Check to make sure On/OFF Switch is on.</li> <li>•Make sure pump is on.</li> <li>•Check Circuit Breaker on bottom of Control Center; if tripped, press rubber cover to reset.</li> </ul>

If power doesn't restore once circuit breaker is reset contact your local pool professional.
